Mid						
End						
Start FEBRUARY						
Mid	Prestige Initiate 4-0-8 apply @ 50g/m <sup>2</sup>	2 bags	Leave for 10-14 days then scarify out dead moss			
End						

The above programme should be used in conjunction with a regular aeration programme to maximise results and is subject to the weather conditions that prevail at the time.

- 1) Use Heptasol for disease 1kg in 25 lts water = 500m<sup>2</sup> (2 kgs green). **DO NOT** use until approx 5 weeks after seed germination, if not the new grasses will be affected by scorch.
- 2) Keep brushing or switching green to remove water. 3) Keep spiking through autumn as long as conditions allow.
